Cambridgeport Jade Economizer

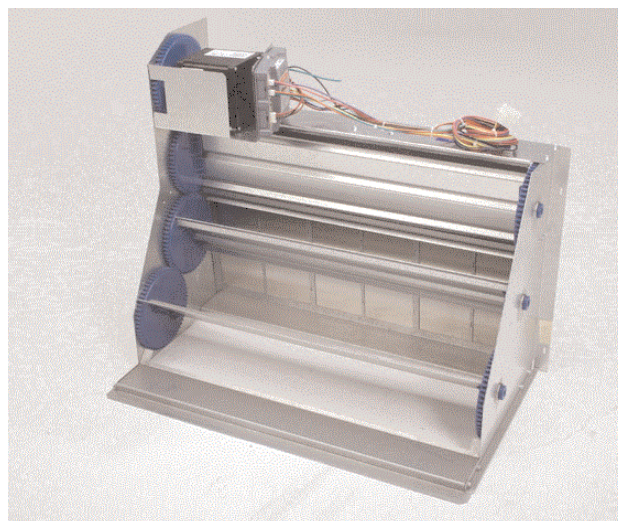

Exceeding Every Economizer Requirement

The future is now. From here on out, you need to meet ever-tougher building codes and challenging new HVAC standards for energy usage and interior air quality.

That means you need an economizer that complies with today's-and tomorrow's-codes, while combining fast delivery, quick installation, and reliability with low maintenance cost.

Built on Cambridgeport's field-proven, gear-driven economizer dependability, the innovative Jade Economizer is the industry's only unit that meets all these tough requirements.

It's equipped with the fully integrated, simple-to-use, and easy-to-troubleshoot Jade™ controller from Honeywell that delivers unprecedented reliability and low maintenance that factory-supplied economizers can't match.

Carrier compatible Economizer

Jade™ controller from Honeywell with unique digital sensor technology

- Unique digital sensors, whose reliability and accuracy deliver correct economizer settings year round, maximizing energy cost savings.
- Integrated single detection enthalpy with optional dual enthalpy, dry bulb, Demand control ventilation (DCV) and smoke detection
- Self-monitoring electronic diagnostics indicate immediately when there's a problem, further lowering support costs.
- Clear messages and programmable setpoints on an easy-to-read user interface simplify controller set-up, reducing installation time by up to 50 percent.
- Years of trouble-free service with Cambridgeport's proven, gear-driven system that has fewer moving parts to wear out.
- Existing Cambridgeport installed economizers may be upgraded to the Jade controller system.

Add all this performance to Cambridgeport's unequalled customer service and support and there's really no other economizer choice.

Cambridgeport

HVAC Products and Accessories

Supplying quality products for the HVAC industry, including Aeon, Bryant, Carrier, Goodman, Heil, ICP, Johnson Controls, Lennox, Luxaire, McQuay, Reznor, Rheem, Trane and York.

- Economizers
